DETAILED ACTION

Allowable Subject Matter

Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Determining the extent to which different myocardial regions are hypertrophied based on sensed amplitudes of an electrogram as claimed is not taught nor suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Zhang et al '343 disclose sensing amplitudes of an electrogram; however, there lacks a teaching or suggestion to determine the extent to which the different myocardial regions are hypertrophied.

Lee et al '081 disclose treating cardiac hypertrophy.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (703) 308-2118.
